 - Edge Ravel
 - Zippering
 - Static Propensity (below 3.5 kv)
- 12' and 6' widths

iLoc Cushion ES

- Lifetime Warranties* on:
 - Wear (10% face fiber)
 - Delamination
 - Edge Ravel
 - Zippering
 - Static Propensity (below 3.5 kv)
 - Cushion Resiliency
- 12' and 6' widths

Why Specify the iLoc® MB Backing System

with Enhanced Moisture Barrier . . .

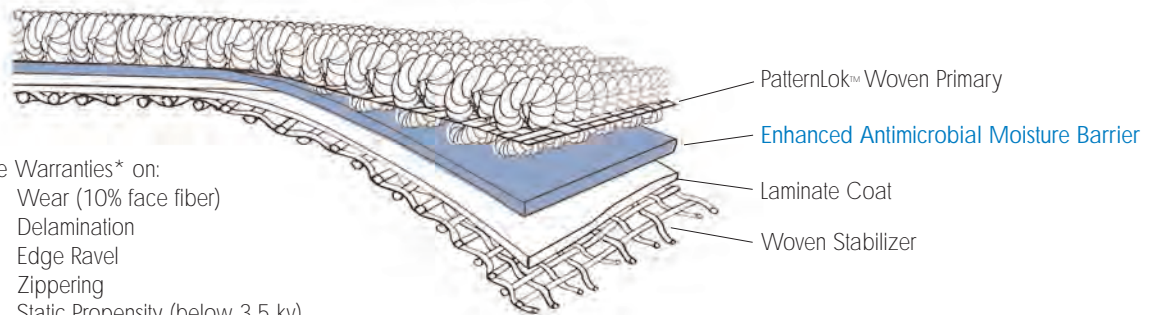

The Enhanced Moisture Barrier prevents spills from penetrating the primary backing even in heavy traffic areas. This allows the spill to remain on the surface for total extraction with no wicking or odors developing.

Recommended for use in high moisture environments such as health care, assisted living facilities and schools. Also recommended for corporate, retail and hospitality interiors where long term appearance retention is critical.

iLoc, a revolutionary, multi-polymer backing system, provides maximum performance benefits while remaining responsive to budgets. iLoc offers these key performance features:

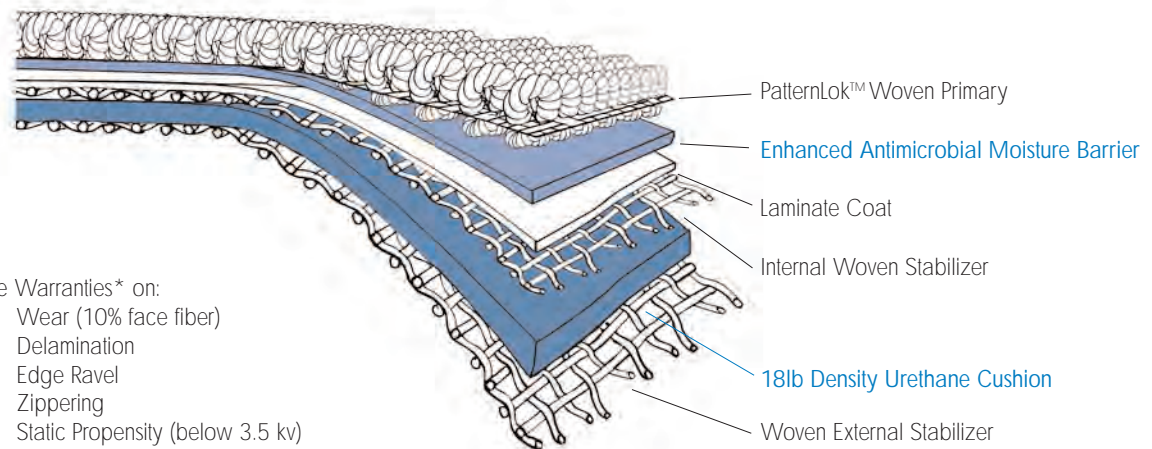

- Impervious to water
- Enhanced appearance retention
- Ease of maintenance
- Ergonomically engineered
- Environmentally safe
- Protected by non-prorated warranties

iLoc MB

- Lifetime Warranties* on:
 - Wear (10% face fiber)
 - Delamination
 - Edge Ravel
 - Zippering
 - Static Propensity (below 3.5 kv)
