## **AVALAR® SD**

*Solution-dyed nylon*

### *Technically Advanced* **Performance Driven**

**A**valar X, Avalar SDX and Avalar SD from Beaulieu Commercial are premium branded, yarn-dyed and solution-dyed Type 6 nylon fibers developed specifically for commercial applications.

With testing and quality protocols that meet or exceed industry standards, and a palette with over 100 leading edge colors, Avalar SDX and Avalar SD offer performance and aesthetics necessary to fulfill the needs of challenging commercial applications.

### *Vertically Integrated from* **Start to Finish**

From polymerizing nylon chips to extruding finished fiber, Beaulieu Commercial's vertical integration assures quality production. Beaulieu Commercial is one of the world's largest extruders of solution-dyed nylon, processing millions of pounds of fiber each year at their Bridgeport, Alabama and Dalton, Georgia facilities. Beaulieu further processes yarns with heat setting, air entanglement and space dyeing, providing the industry competitively priced, performance-oriented, quality carpet fiber.

### *Engineered for Lasting* **Color Clarity**

Because color pigments are added to Avalar SDX and Avalar SD while their polymers are still in the molten state, color is evenly saturated and virtually becomes part of the fiber itself.

- Locked-in color means carpets can be cleaned easily, using the most aggressive cleaning methods.
- Fiber is measured and tested for quality during every step in the production process.

### *An infusion of* **Color, Texture, & Freshness**

Avalar offers the advantages of solution and yarn-dyed nylon, with no need to compromise on color.

- With an expanded color line, Avalar SDX and Avalar SD offer more current color additions to help you coordinate carpet with other interior finishes.
- Innovative yarn processing allows new texture options.
- Avalar X and Avalar SDX offer Puralex, a refresher that is environmentally friendly and specially formulated to help purify the air. This breakthrough technology is self-renewing and withstands multiple cleanings while creating fresh environments.

### *Backing It* **All Up**

When specifying carpet, fiber choice is key to both performance and aesthetic considerations. Avalar fibers carry the assurance that they will perform to your expectations and ours.

- Warranty protection that matches the most rigid industry standards for stain and color fastness.
- Quality testing throughout the manufacturing process certifies the performance standards for Avalar X, Avalar SDX and Avalar SD.
